

AOPico Montauk Series

Industrial Green picosecond laser

- Maintaining superior performance and reliable long-term power stability
- Pulse energy up to 40 μ J
- Wide frequency, outputs >30W@500K
- Low cost integration

► Features & Benefits:

The all-in-one design makes the laser more compact and reduces the total weight. It saves space for installation on the customer side, lowers the integration cost and simplifies the installation process. The water-cooled design allows the laser to work reliably in various harsh and extreme environments and makes the laser to be the ideal candidate for the 7x24 non-stop production needs.

The output power of 5W, 20W, 30W, and up to 60W are available for selection. The pulse width is around 10 ps across the repetition rate range of 500k to 1500k. With pulse energy of 40 μ J, burst mode and PoD function, it is the perfect candidate for various application areas, including optical filter cutting, solar cell scribing, ITO scribing, and so on
