

85206 - 16 mm Lens

FIND-R-SCOPE 16 mm, f 1.4 Standard C-Mount Lens with Manual Iris.

The FIND-R-SCOPE® 85206 16 mm Lens is for use with the units that have the C-Mount capability. It is an f 1.4 speed lens with a built-in manual iris.

When used with Infrared Viewers that have a C-Mount lens mount option, this optional f/1.4, 16 mm lens provides a narrower field of view and larger display of target than standard lens. Built in is a manual iris that can be used to control intensity and increase the depth-of-field. This helps to reduce the necessity to refocus for changes in distance.

This is the standard lens supplied with Infrared Viewers/Cameras part numbers 85400, 85345, 86400, 86345 and 89400.
