

85225 - 25 mm Lens

FIND-R-SCOPE, 25 mm, f/1.4 Standard C-Mount Lens with Manual Iris.

The FIND-R-SCOPE® 85225 25 mm, f/1.4 lens is for use with Infrared Viewers/Cameras part numbers 85400, 85345, 86400 and 86345. It is an f/1.4 speed lens with built in iris.

This lens can also be used with model 89400 or with models 84499 and 84499-5 when the adapter ring is used.

When used with model 84499 or 84499-5, this optional f/1.4, 25 mm lens provides approximately a 31 degree field of view and a magnification of 0.22 at its close focus distance of 114.3 mm, (4.5"). When used with model 89400, the lens provides approximately a 14 degree field of view and a magnification of 0.22 at its close focus distance of 114.3 mm, (4.5").

The built-in manual iris can be used to control intensity and increase the depth-of-field. This helps to reduce the necessity to refocus for changes in distance.
